

CR - COLAPSIBLE POWER REEL

The CR Collapsible Power Reel is used for rapidly stringing or taking up wire or small diameter cable. Ideal for placing or removing aerial cable, taking down wire or pulling winch line into conduits.

The CR Power Reel from Schutt Industries is designed to increase your company's productivity while at the same time reducing expense and maximizing safety.

The CR Collapsible Reel is designed for picking up wire in neat rolls. The Reel is simply pushed onto the winch shaft, compressing the spring and then turned to lock onto the shaft. After the wire is coiled onto the reel, a quick-acting handle is used to collapse the outer rim of the pick-up reel, allowing the coiled wire to be removed.

The Schutt Industries CR Power Reel is built military-grade strong and will last for years of service. Schutt Industry brand trailer products perform better and last longer with fewer service issues than any other product of their type on the market today. Now that's vaue!
